

# VISUAL waterfalls

**V**isual WaterFall™ is one of the most popular waterfalls on the market. It creates a beautiful sheet flow effect. The extraordinary combination of light and visual effect created by the fiber optic waterfall will provide a more animated and interesting landscape feature that brings your swimming pool to life.

These unique Fiber Lit Sheer WaterFalls come complete with fiber pre-attached. Illuminati's Visual Waterfalls adds a dramatic nighttime excitement that is breathtaking.

*“The effects of this unique combination of water, light and sound has quickly made the visual waterfall one of our most popular products.”*

*- Illuminati*

**Residential Project: Miami Florida**

# FIBER OPTIC WATERFALLS

An Illuminator is needed to install this fixture.

### Recommended Illuminators

See details about ION-Series Illuminators

Ion Series LED Illuminators

We have taken the Original Waterfall and added fiber optic lighting and the results are stunning. Visual Aquatics Waterfall™ is one of the most popular waterfalls on the market. It creates a beautiful sheet glow effect.

### VisualWater Falls - Fiber Optically Lighted Sheer Falls - White Only

VAWF-12-9-NF-40F	12" Visual Waterfall, 40' Fiber- 25 Strand
VAWF-18-9-NF-40F	18" Visual Waterfall, 40' Fiber- 50 Strand
VAWF-24-9-NF-40F	24" Visual Waterfall, 40' Fiber- 50 Strand
VAWF-36-9-NF-40F	36" Visual Waterfall, 40' Fiber- 75 Strand
VAWF-48-9-NF-40F	48" Visual Waterfall, 40' Fiber- 100 Strand

#### Special Order

VAWF-60-9-NF-40F	60" Visual Waterfall, 40' Fiber- 150 Strand
VAWF-72-9-NF-40F	72" Visual Waterfall, 40' Fiber- 150 Strand
VAWF-84-9-NF-40F	84" Visual Waterfall, 40' Fiber- 175 Strand
VAWF-96-9-NF-40F	96" Visual Waterfall, 40' Fiber- 200 Strand

We also offer on a Special Order Basis - Radius Cuts & Bottom Feed. Please contact us.

### VISUAL WATERFALL™

Sheet flow waterfalls naturally narrow as they fall. This is illustrated by the diagram below. The diagrams to the right show the recommended waterfall height from the lip of the fall to the water surface.

Waterfalls naturally narrow as they fall

12 " Visual Waterfall

24 " Visual Waterfall

36 " Visual Waterfall

48 " Visual Waterfall

Recommended waterfall height from lip of fall to the water surface

1" extended lip waterfall

6" extended lip waterfall

9" extended lip waterfall

12" extended lip waterfall

NOTE: All waterfalls are back-fed.  
Bottom feed available by request.

# DESIGN GUIDE

# VISUAL WATERFALL

Note: Never remove more than 4.5" of the extended lip, leaving a minimum of 1.5" of lip. The top of the beam, where the Visual Aquatic Water Fall unit is to be installed should be a minimum of 9" thick.

When designing custom curves for the Visual Aquatic Falls Extended Lip models, please refer to the following Minimum Radius Table to select the correct Visual Aquatic Falls model. Some models accommodate very tight radius curves and are available by special order.

## MINIMUM RADIUS PER WATERFALL LENGTH

- 1' long fall = 1' minimum
- 1.5' long fall = 1.5' minimum
- 2' long fall = 2' minimum
- 3' long fall = 3' minimum
- 4' long fall = 4' minimum
- 5' long fall = 5' minimum
- 6' long fall = 6' minimum
- 7' long fall = 7' minimum
- 8' long fall = 8' minimum
